Opis produktu

Matt Case

Stylish protection for your smartphone, resistant to dirt, scratches, and discoloration.

Increased Durability

What are your expectations when you put a new case on your phone? Do you value resistance to scratches, discoloration, and fingerprints? Do you want the case to fit perfectly, made with attention to detail and maintain its aesthetic appearance for a long time? This is Matt Case – a case with increased durability from 3mk.

Tested Drop Resistance

Matt Case perfectly protects your phone during a fall, cushioning the impact force. The Absorber125™ resistance class confirms that the phone secured with Matt Case survived 26 drops from a height of 125 cm without any damage. This is more than the Military Grade standard requires.

The dscout research experiment showed that the average user holds their phone in hand for almost 2.5 hours a day. Matt Case has the certification of the State Hygiene Institute, which guarantees that it is free from harmful substances and safe for health – regardless of how much time you spend with your phone.

When protecting phones, we also care about the planet. Matt Case has passed the RoHS certification in an independent laboratory – this means that it is environmentally friendly and complies with strict EU directives regarding the content of heavy metals and hazardous substances (including lead, mercury, and cadmium).

Easy Cleaning

A moment of inattention and you've got a stain again? Discover the first case on the market that you can easily keep spotless. Thanks to high-quality craftsmanship, you can wash it in the washing machine with other clothes or fabrics. No scrubbing, no strong detergents, no need to buy another product.

Easy Wireless Charging

The structure of Matt Case is compatible with inductive chargers, allowing you to conveniently charge your phone wirelessly without removing the case.

Protection Against Contaminants

Matt Case is very flexible and fits perfectly to the body of your phone, protecting it from the destructive action of sand and dust. The screen is protected by gently raised edges of the case, compatible with 3mk glass and films.

Precision Craftsmanship

Matt Case protects all protruding buttons, and the EasyClick™ Buttons standard guarantees their full sensitivity. Matt Case also features precise cutouts for all necessary phone ports.

Lens Protection

Matt Case has raised edges around the lenses. Whenever you put the phone down, the lenses do not directly touch the surface and are perfectly protected from cracking.

FAQ - Frequently Asked Questions

What material is the case made of?

Matt Case is made of flexible TPU material.

How does Matt Case differ from other black cases?

Matt Case is made of an incredibly durable and strong component that is easy to maintain. It does not discolor, even when cleaned with an alcohol-based cleaner.

Why does the case cost so much?

Many manufacturers focus on product design. At 3mk Protection, design goes hand in hand with care for testing and safety. Instead of empty slogans – concrete details: Absorber125™, PZH and RoHS certificates.
