Rodzaj	**Antybakteryjne**
Typ	**Folia ochronna**
Przeznaczenie	**Telefon**
Obszar ochrony	**Ekran**

Opis produktu

MS CRYSTAL BacteriaFREE

Did you know that...

2617 – that’s how many times a typical user touches their device’s screen in a single day.
According to many studies, a phone screen can contain up to 10 times more bacteria than door handles, shoe soles, or a toilet seat. Bacteria thrive because phones often heat up, and with each touch you leave behind skin cells, sweat, and other particles that serve as food for bacteria.

Effective protection against bacteria

The antibacterial coating using zinc oxide (ZnO) reduces almost 100% of known viruses, fungi, and mold on the screen surface.

Safe for you

Contains no active chemical substances, making it safe, non-irritating, and hypoallergenic.

Spotless clarity

We have also enriched the film with an anti-smudge coating, making it easier to remove fingerprints and dirt for greater user comfort.

Perfect fit

Our laser cutting technology ensures that the CRYSTAL BacteriaFREE film is perfectly fitted, protects the entire flat surface of the screen, and has the necessary cutouts for the camera, sensors, and speaker.

Scratch protection

With a hardness level of 4H, the film effectively protects your screen from scratches and is only 0.14 mm thick.

Easy to install

Each MyScreenPROTECTOR product comes with a video tutorial available on our website and YouTube channel.

Technical Specifications

Package includes	1 pc. CRYSTAL BacteriaFREE antibacterial film, wet wipe, dry wipe, EasyApp® installation kit, multilingual instructions
Type of protection	Antibacterial film
Scratch resistance (hardness)	4H
Thickness	0.14 mm
Compatibility	Vivo V40 SE
