Dedykowana marka	**Xiaomi**
Obszar ochrony	**Ekran**

Opis produktu

Did you know that...

2617 – that’s how many times a typical user touches their device screen daily.
According to many studies, a phone screen may contain up to 10 times more bacteria than door handles, shoe soles, or toilet seats.
Bacteria thrive because phones often heat up, and with every touch you leave behind skin particles, sweat, and other residues that serve as nutrients for bacteria.

Effective protection against bacteria

The antibacterial coating using zinc oxide (ZnO) reduces nearly 100% of known viruses, fungi, and mold that accumulate on the screen surface.

Safe for you

Does not contain active chemical substances, making it safe, non-irritating, and non-allergenic.

Squared cleanliness

The film has also been enhanced with an anti-smudge coating, which facilitates the removal of fingerprints and dirt for increased user comfort.

Perfectly fitted

Thanks to our laser cutting technology, the CRYSTAL BacteriaFREE film is perfectly fitted, covers the entire flat surface of the screen, and has necessary cutouts for the camera, sensors, and lens.

Scratch protection

With a hardness level of 4H, the film effectively protects your screen from scratches, and it's only 0.14 mm thick.

Easy to install

Every MyScreenPROTECTOR product comes with an instructional video available on our website and YouTube channel.

Set includes	1 pc. CRYSTAL BacteriaFREE antibacterial film, wet cloth, dry cloth, EasyApp® installation kit, multilingual manual
Type of protection	Antibacterial film
Scratch resistance (hardness)	4H
Thickness	0.14 mm
Compatibility	Redmi 9A/9C/9AT
