Opis produktu

3mk FlexibleGlass

Invisible protection

We know the original look of the smartphone is important. That's why we created glass that not only protects the screen excellently, but moreover – is almost invisible. Less than half a millimeter is the thickness that's really hard to notice and feel under the finger. Thanks to this, you have the sensation that the finger glides on smooth glass. Need solid protection in a discreet form? Choose FlexibleGlass™!

Protection stronger than ever

Increasing the screen strength by 250% makes a difference. With our Flex, drops from height on hard surfaces become harmless to your phone screen. The hybrid absorbs impact energy, effectively protecting the display from breaking. Therefore, with FlexibleGlass™ you can use your phone stress-free even when climbing rocks.

Perfectly smooth screen

FlexibleGlass™ is highly scratch-resistant thanks to an additional ceramic layer, which provides glass hardness at 7H. With our hybrid, you can be sure your phone screen will be like new even after long-term use. You can carry the smartphone in your pocket or bag along with keys, and our glass will ensure that not a single scratch appears on the display.

Cut to measure

Choose the Flex dedicated to your phone model. Then you can be sure the glass will protect your display. Moreover, our hybrid glass can be quickly and perfectly applied to the screen with the help of convenient Fit-In™ positioning stickers. Opt for dedicated display protection and hassle-free installation. Choose FlexibleGlass™!

Guarding your safety

FlexibleGlass™ protects not only your smartphone screen but also cares for your safety. A special antibacterial coating, with which Flex is equipped, provides protection against viruses and bacteria. We touch the smartphone screen dozens of times daily. Therefore, it's worth thinking not only about the safety of our device but also about our own safety. Put our reliable hybrid on your screen and forget about any threats lurking when using your smartphone!

Instant touch response

Nothing annoys like an unresponsive screen. That's why we ensured FlexibleGlass™ perfectly reacts to finger touch. If you like gaming on your phone, choose our hybrid. We guarantee it won't disappoint you. Touch and action. Moreover, thanks to the oleophobic layer, the display is protected from dirt. Apply Flex and enjoy a highly responsive and clean screen!

Technical Data

Product type	Hybrid glass
Thickness	0.3 mm
Scratch resistance	7H
Impact resistance	Up to 250%
Certificates	• PZH (safe for human health) • RoHS (free of heavy metals)
Applied technologies	• Ceramic coating enhanced structure • Laser production technology • Inviscid-Sil™ adhesive substance • Fit-In™ positioning stickers • Dust-Fix™ stickers
